

# Dial-A-Flare™ Foam Stapler

- The Dial-A-Flare™ single adjustment means less parts and more positive flare control.
- Less parts mean increased durability, increased production, less maintenance, and lower parts costs.
- Parts are a fraction of the cost of competitive models.
- The Vertex contact trip mechanism is easily and quickly actuated since it was designed for foam stapling.
- Because of the application, nose and flare parts were designed using "tool steel" to increase durability and promote long life.
- Fast, easy, bottom staple loading design makes reloading a snap.
